

1. doc: D:\namorlize\5.2 Documentation Updates

2. Normalize installation:

2.1. Prepare

- new 2 windows 2012 VM (one for SQL/ORACLE database, one for Normalize)
- harddisk:100g
- memory:(nl:8g,db:10g)
- cup: 4 (at least)
- win 2012 installation type : standar server with GUI)
- after vm created, ip set, but not connected. to fix: vm - edit setting - network adapter - network label (choose on available network, not the default here, very very important.)
- close firewall, enable remote connecting (pc- properties - remote setting), install .net 3.5, iis from control pannel - Turn Windows features on or off - features

2.2. install DB servers on 11.183

- SQL2014 : <\\192.168.8.25\iso\APP\MicrosoftSQLServer\SQL2014> (installed)
- ORA12.1.0.2: <\\192.168.8.25\installer\Windows\Oracle\Database12.1.0.2> (installed)
- SQL2016 : <\\192.168.8.25\iso\APP\MicrosoftSQLServer\SQL2016>
- PatchForSQL2016: <\\192.168.8.25\installer\Windows\Microsoft\SQLServer\KB2919355-x64.msu>
-

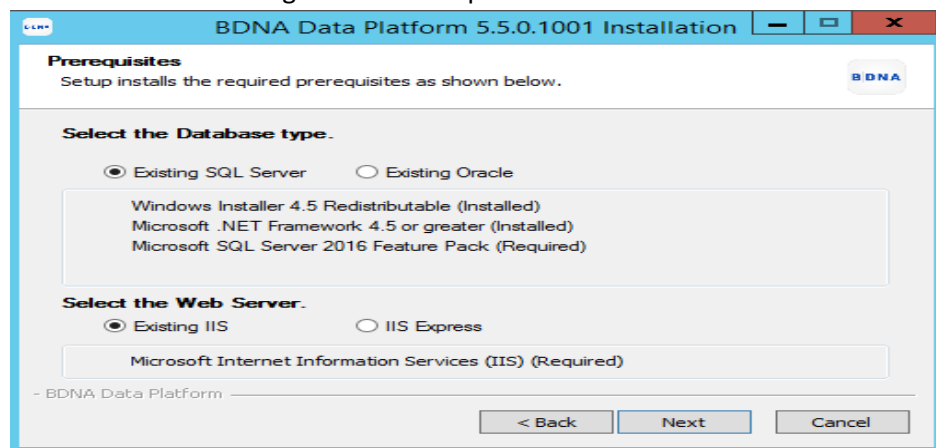

2.3. install DB client on 11.184

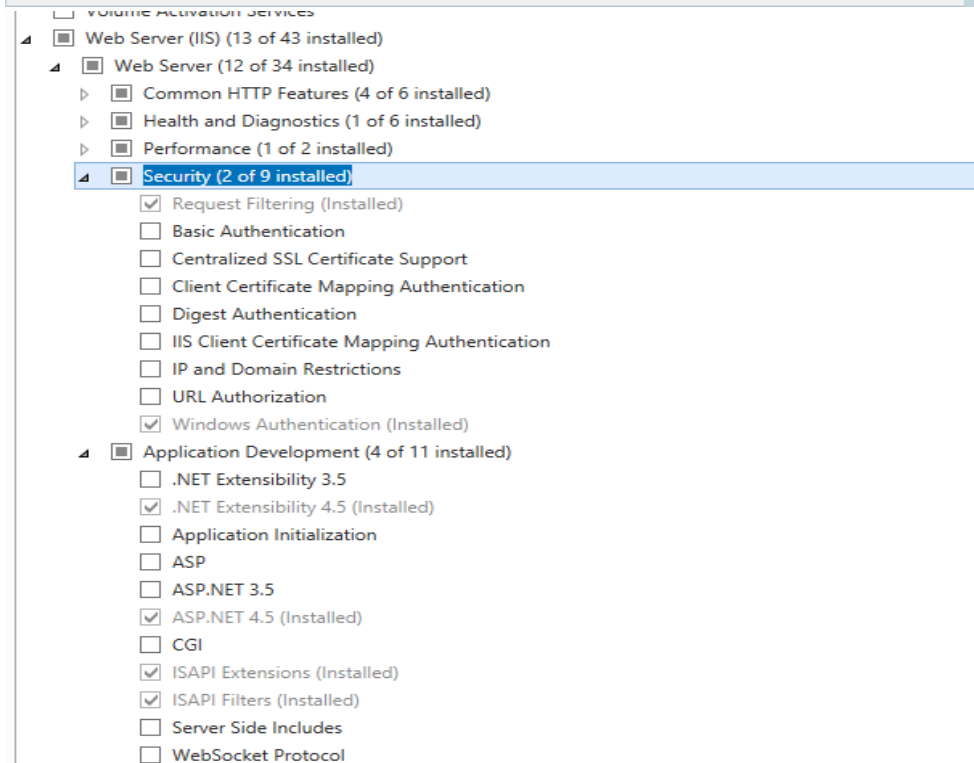

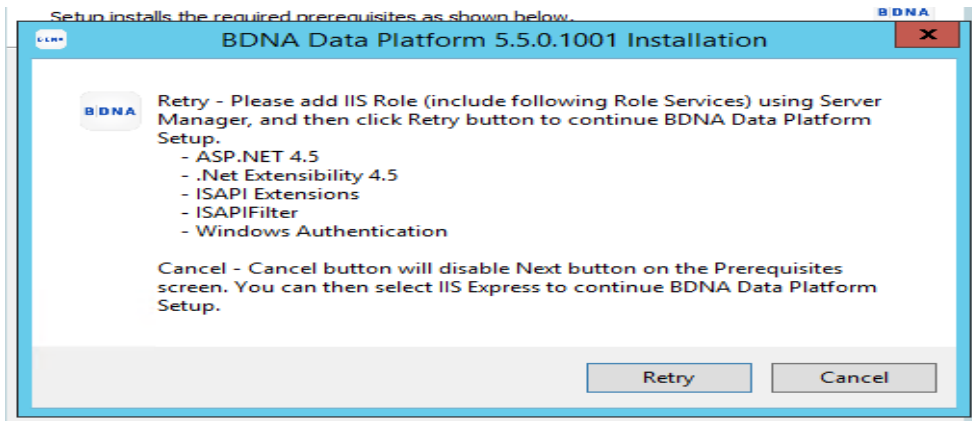

2.4. Install DP.

- Installer: <\\192.168.8.25\installer\BDNA\Normalize5.5\test>

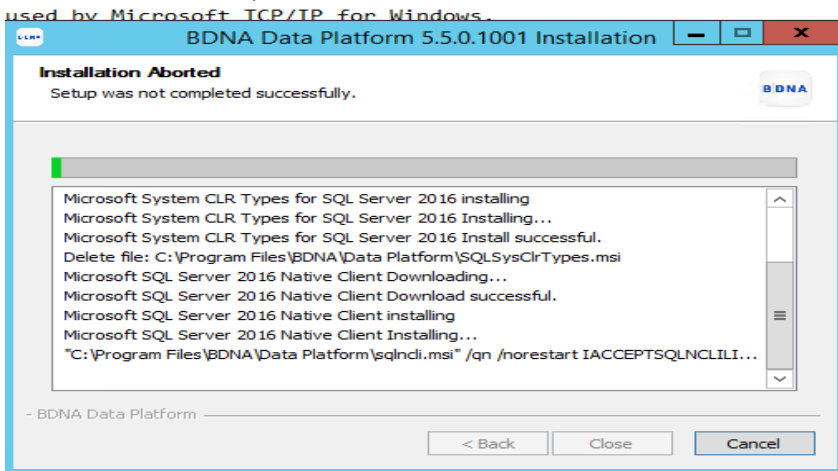

Name	Date modified	Type	Size
BDNA Normalize Migration Wizard	12/13/2017 5:02 AM	Application	5,050 KB
Data_Platform_550_1001_x64	12/13/2017 5:05 AM	Application	48,237 KB
User_Console_550_1001_x64	12/13/2017 5:11 AM	Application	691,331 KB

-
- Install and uninstall DP once manually, in order to know what extra services needed to be installed before running the install scripts.

d. Install failed, need sqlncli:

e.

- f. Install: \\192.168.8.25\app\BDNA\Components\SQL2016_sqlIncli_x64_ENU.msi
- g. Install DP again. Last step, you are required to activation key, means installation is OK. Cancel it.
- h. Uninstall DP. (control panel)

2.5. Configure script files. (script folder need to be put under root directory C:\InstallScript)

a. Scripts:

	Certificate	12/19/2017 1:13 AM	File folder

```

主要的安装脚本

安装版本

安装类型, MSSQL或者Oracle

设置配置文件, 默认Windows验证, 带AD或LDAP的是AD或LDAP验证

c.

d.

e. installation.config 改数据库 ip, 你设置了哪个 installation.config 就改哪个

```
zLWUzMKTyLGSu04jajC4Akc3OmZ069yCqQK5oCQn3B4Pinhiq+yA7U19KsVGLciznHKDxVJ02+JELGfOX0YJf4gIhVGuxkEKTIDZv1arZU2LJxde+BSzz69u6oztHncWmCDkJXn2mQZshDE3

<TUSOfflineURL>http://tus50.bdna.com/GetOfflineUpdatedFile.aspx</TUSOfflineURL>

<ConnectionType>MsSqlServer</ConnectionType>
<Host>192.168.10.48</Host>
<User>SA</User>
<Password>AQougntJw9z/NWY/RZ0B2w==</Password>
<Pooling>false</Pooling>
<MinPoolSize>0</MinPoolSize>
<MaxPoolSize>100</MaxPoolSize>
<ConnectionLifetime>30</ConnectionLifetime>
<Catalog>MASTER</Catalog>
<WindowsAuthentication>>false</WindowsAuthentication>
<UseCurrentUser>>false</UseCurrentUser>
<ConnectAsUser />
<ConnectAsPassword />
```

改host，这里密码应该是Simple.0，SA用户的密码

有需要就该，可以明文

50SanityCheck_auto_X64.bat x Installation_ad1184.config x UX_ad1184.config x hosts x DPUX50SanityCheck_auto_X64.bat x UX.config x installation.config x

```

<value>
  <string>
    <![CDATA[
      <ConnectionType>MsSqlServer</ConnectionType>
      <Host>192.168.10.48</Host>
      <User>BDNA</User>
      <Password>li8ZeOp6XPw=</Password>
      <Pooling>>false</Pooling>
      <MinPoolSize>0</MinPoolSize>
      <MaxPoolSize>100</MaxPoolSize>
      <ConnectionLifetime>30</ConnectionLifetime>
      <Catalog>BDNA</Catalog>
      <WindowsAuthentication>>false</WindowsAuthentication>
      <UseCurrentUser>>false</UseCurrentUser>
      <ConnectAsUser />
      <ConnectAsPassword />
    ]]>
  </string>
</value>
</SerializableDictionary>
<SerializableDictionary>
  <key>
    <string>Configuration/Normalize/PDB_DBConnection</string>
  </key>
  <value>
    <string>
      <![CDATA[
        <ConnectionType>MsSqlServer</ConnectionType>
        <Host>192.168.10.48</Host>
        <User>BDNA PUBLISH</User>
        <Password>li8ZeOp6XPw=</Password>
        <Pooling>>false</Pooling>
        <MinPoolSize>0</MinPoolSize>
        <MaxPoolSize>100</MaxPoolSize>
        <ConnectionLifetime>30</ConnectionLifetime>
        <Catalog>BDNA_PUBLISH</Catalog>
        <WindowsAuthentication>>false</WindowsAuthentication>
        <UseCurrentUser>>false</UseCurrentUser>
        <ConnectAsUser />
        <ConnectAsPassword />
      ]]>
    </string>
  </value>
</SerializableDictionary>
</value>

```

host改成你的SQLserver，password这里是bdna加密后的密码，可以用明文

192.168.11.184 > c\$ > cacey > InstallScript > ConfigFile

Name	Date modified	Type	Size
installation.config	12/14/2017 7:34 PM	CONFIG File	13 KB
installation.DefaultAD.config	12/14/2017 7:35 PM	CONFIG File	13 KB
installation.DEMO.config	10/10/2017 7:18 AM	CONFIG File	12 KB
installation.LDAP.config	12/12/2017 10:53 ...	CONFIG File	14 KB
installation.LotofUSER.config	10/10/2017 7:18 AM	CONFIG File	12 KB
installation.wa.config	10/10/2017 7:18 AM	CONFIG File	12 KB
UX.config	3/24/2017 1:13 AM	CONFIG File	2 KB
UX.DefaultAD.config	3/24/2017 1:13 AM	CONFIG File	2 KB
UX.DEMO.config	3/24/2017 1:13 AM	CONFIG File	2 KB
UX.LDAP.config	12/12/2017 10:48 ...	CONFIG File	2 KB
UX.LotofUSER.config	3/23/2017 2:34 AM	CONFIG File	2 KB
UX.wa.config	5/5/2017 2:41 AM	CONFIG File	2 KB

这些不是我设置的，我看了下
wa就用带wa的
AD就用带DEMO的
LDAP就用打的LDAP的

f. license path : update UX.config

tool

2.9. Patch set:

Structure:

[bdna@VMDC8245 AnalyzePatchSet]\$ ls

Installer Patch Readme.txt updater.config

Installer: same file as the source code (replace).

Patch: modified or new (hotfix).

Readme.txt: description for bugs.

updater.config:

1. Backup original files: backup dir for 'Rollback', one dir one node.

2. Run SQL: these sql for different DBType will be run while installing the patchset. (take effect right now, called hotfix, can be modified files or new files)

3. Update files: just the modified file, file in the installer. if the new file in 'Run SQL' was not included in source code, ignore it here.

3.1. 'Goto="end"' should be set in the last node, otherwise it will end earlier.

4. Restore original files: if there are multiple node needed 'Rollback', 'id="Rollback"' should be unique and in the first node.

4.1. 'ExitCode="1"' should be in the last Rollback node.

```
<?xml version="1.0" encoding="utf-8" ?>
<configuration>
  <Actions>
    <!-- Backup original files --> 1. backup dir for 'Rollback', one dir one node.
    <Copy todir="%NORMALIZE_BI_HOME%\Tmp\552_Analyze_Procedures\Oracle" Overwrite="true" IgnoreError="false" OnErrGoto="End">
      <Fileset source="%NORMALIZE_BI_HOME%\Database\Oracle\Script\DM_Create_Objects.sql" dest="DM_Create_Objects.sql" />
      <Fileset source="%NORMALIZE_BI_HOME%\Database\Oracle\Script\NBI_Create_Objects.sql" dest="NBI_Create_Objects.sql" />
    </Copy>

    <Copy todir="%NORMALIZE_BI_HOME%\Tmp\552_Analyze_Procedures\SQLServer" Overwrite="true" IgnoreError="false" OnErrGoto="End">
      <Fileset source="%NORMALIZE_BI_HOME%\Database\SQLServer\Script\NBI_Create_Objects.sql" dest="NBI_Create_Objects.sql" />
    </Copy>

    <!-- Run SQL --> 2. these sql for different DBtype will be run while installing the patchset. (take effect right now, rather than hotfix)
    <DBScript Database="Publish" IgnoreError="false" OnErrGoto="END">
      <Fileset DatabaseType="Oracle" source="Patch\Oracle\DM_Create_Objects.sql"/>
      <Fileset DatabaseType="Oracle" source="Patch\Oracle\NBI_Create_Objects.sql"/>
